Advanced Body Contouring & Skin Tightening

TriPollar™ is a clinically proven technology which exclusively utilizes the effects of Uni-polar Radio Frequency and Bi-polar Radio Frequency energies, to focus deep heat to the collagen layer causing existing collagen to contract for an immediate improvement and skin tightening effect.

Over the long-term, this heating accelerates metabolism to increase new collagen fibers, for a tighter, smoother, more contoured shape, appearance and texture without pain, injections, surgery or downtime.

Treatments are done once a week for a minimum of 6 weeks on the face and 8 weeks on the body. Treatments are then recommended every 4 to 8 weeks, until desired results are achieved. Maintenance treatments are recommended twice a year.

Per Treatment - \$175

Package of 6 - \$825

Package of 10 - \$1200

TriPollar Rejuvenation Facial - \$225
Includes an oxygenation facial and a TriPollar skin tightening treatment.

GST NOT included in Prices

- **stretch marks reduction**
- **reduction of double chin**
- **post-pregnancy skin tightening**
- **lax skin after significant weight loss**
- **circumference reduction**
- **localized fat reduction**

Prices subject to change without notice

Body Contouring and Circumference Reduction

Despite your best efforts to diet and exercise, you may still suffer bothersome fat deposits and bulges, caused by fat cells that enlarge and change the body's contour and shape. For women much of this fat accumulates in the abdomen, hips, waist and buttocks. For men, this is most apparent in the abdomen, "love handles," chest and buttocks.

TriPollar™ treatments contour, smooth, tones and lifts and offers a non-surgical choice for body contouring and fat reduction that effectively treats local fatty deposits at the root of the problem.

Clinically proven to be safe and effective, TriPollar™ technology selectively heats the fat cells in both the deep and superficial fat layers forcing the secretion of the fatty acids into the blood and lymph system where it is disposed naturally.
